Installing CC4 Anywhere *(iPad)*

What information you need

- Your **CC4 username** and **password** (You must have used them at least once before.)
- The **URL address** for your school or college's CC4 Anywhere website, e.g. **www.anywhere.myschool…**
- The **domain** of your school or college.

If you don't have this information (or if you need help with proxy server settings) ask your network administrator.

How to install Citrix Receiver for iPad

Download the Citrix app...

1 Run the App Store and search for **Citrix Receiver for iPad**.

2 Tap **Install**.

3 Enter your AppStore username and password.
In a few seconds the Citrix app will download and install itself.

Where are you?

Are you planning to install the Citrix app while you're on-site in your school or college? If so, before you can start, your iPad needs to be able to access the Internet using your school or college's wi-fi network.

Your network administrator can provide the proxy server details needed to set up your iPad for the network, if this hasn't already been done.

If you're installing the Citrix app on your iPad outside the school or college, you won't need to do this.

Then set up your account…

1 Run the Citrix app. At the Welcome screen, choose to 'Set up my enterprise app store'.

2 Type in the URL address of your CC4 Anywhere website.

3 Type in the domain and your CC4 username and password, and tap **Save**...

…You will see **CC4 Anywhere Desktop**, and maybe other desktops and applications, depending on what has been published by your network administrator.

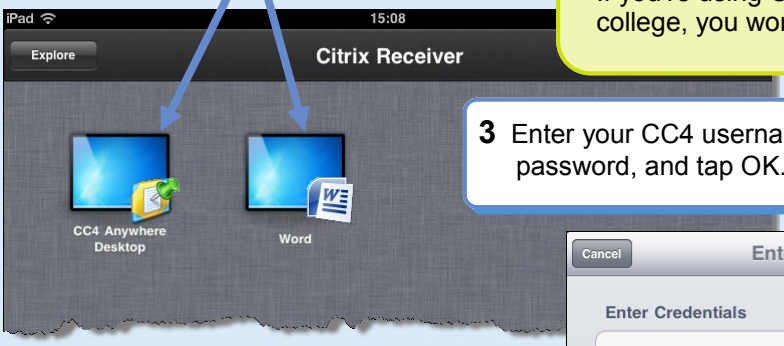

5 Tap the green **+** beside each desktop and application that you will want to use.
Tap **Home** to finish.

Using CC4 Anywhere on an iPad

1 Run the Citrix app.

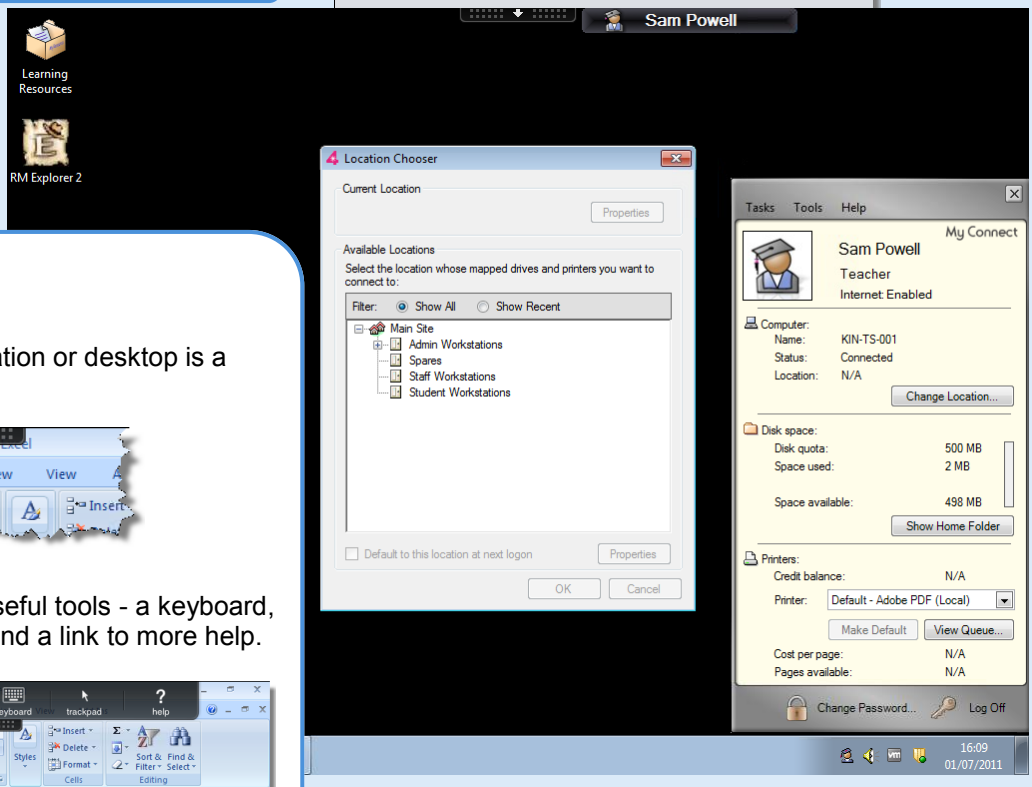

2 Tap the desktop or application you want to use.

3 Enter your CC4 username and password, and tap OK...

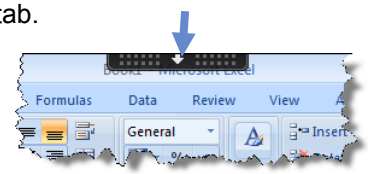

… and you can start using your chosen desktop or application.

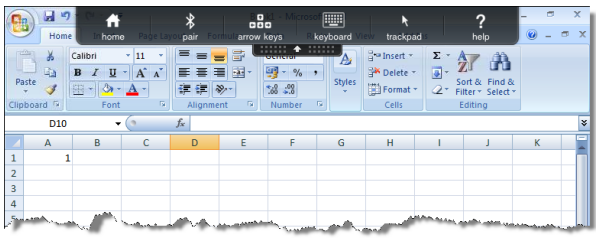

Tools to help you

At the top of each application or desktop is a small tab.

Tap it to get a menu of useful tools - a keyboard, arrow pad or trackpad - and a link to more help.

Where are you?

To use CC4 Anywhere on your school or college wi-fi network, you will need to **turn off** your HTTP Proxy in your iPad wi-fi settings. You will need to do this each time you use CC4 Anywhere in the school or college.

If you're using CC4 Anywhere outside the school or college, you won't need to do this.

For general instructions on using CC4 Anywhere applications and desktops, see *Using CC4 Anywhere QuickStart* guide.

What it does

CC4 Anywhere lets you connect to your school/college network using many kinds of computing device.
You can use programs from a computer where they aren't installed, and do your work from anywhere you can use the Internet.
